

# FG DOOR

## Technical Data Sheet

### Product Information

#### Dimensions:

Standard maximum height: 12ft  
1/2" – 3/4" Glass thickness

#### Acoustic Performance:

No Lab Testing available

#### Hardware:

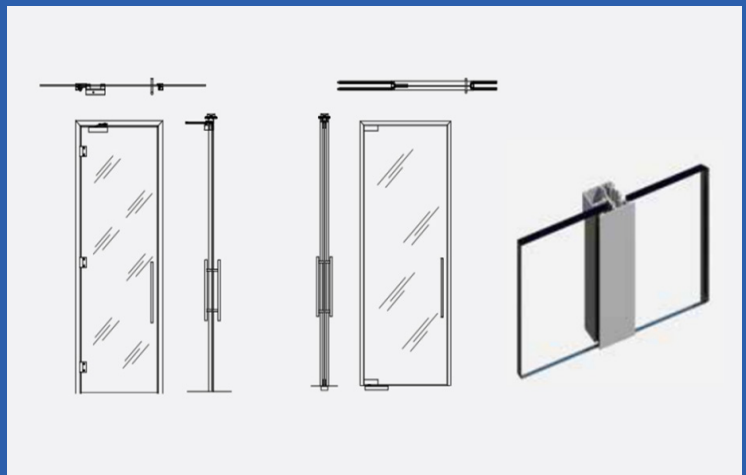

Sky 365 standard hardware  
Custom hardware schedules accommodated

#### Glass Types:

Tempered  
Heat Soaked  
Annealed  
Ballistic  
LCD  
Tinted

#### Swing Options:

Center Pivot (double or single acting)  
Offset Pivot

Sky 365's Full Glass Door maximizes the daylight opening on the door whilst still retaining the highest STC available by sealing the perimeter against the frame.

Fully Tempered or Tempered Laminated doors up to 3/4" thick can be accommodated with frame mounted hinges or offset pivots.

Alternately a frameless system can be used with our own 'patch' fittings. Please contact our design team for further information.

#### American Standards

- Sound Measurements
- Sound Rating
- Structural Stability
